

Creating scenes an events– Concept Map

Quick tips

1. Use any tools or even a piece of paper to create a concept map like this
2. Think of events, even if they will not be included in the final story
3. For each event describe the 5Ws (Who, Why, Where, What, When)
4. Create as many events as you like
5. Chose the events best suiting your story idea

STORY LOGIC NET

Instructions

Print out the card and give it to a student or a group of students. Ask them to fill it in as they like, following the tips on the back side of the card. It might be helpful to create maps like the example on the card, using blank paper sheets.

Design as many scenes as you wish and then combine some or all of them to create a coherent story. Examine and decide how they can connect to each other, how the transition from one to another can be more interesting and/or realistic

Suggestions

1. Advise the students to work on individual scenes which include the characters they have designed. Then they can select some of them and put together a story
2. Give simple ideas to the students for creating scenes. For example “Picture your character in his/her home on a normal day and provide description”.
3. Assist the students through reflective questions in connecting character features with scenes. For example, can a rebellious character have a very tidy bedroom?
